Dry Eye Curly Coat Syndrome (CCS) - PCR

Result: Genotype N/N

Interpretation: The dog is homozygous normal concerning the intact gene. The dog is genetically clear and will not be affected by Dry Eye Curly Coat Syndrome.

The dog can pass only the normal gene on to all its offspring.

The result is only valid for Cavalier King Charles Spaniel breed.

Episodic Falling - PCR

Result: genotype N/N

The analysed dog is homozygous for the normal gene and does not carry the mutation associated with Episodic Falling in Cavalier King Charles Spaniel. The dog will not develop symptoms. If bred, the dog will only pass on the intact gene to its offspring.

sample ID: 1510-N-02465

The current result is only valid for the sample submitted to our laboratory. The sender is responsible for the correct information regarding the sample material. The laboratory can not be made liable. Furthermore, any obligation for compensation is limited to the value of the tests performed.

There is a possibility that other mutations may have caused the disease/phenotype. The analysis was performed according to the latest knowledge and technology.

The laboratory is accredited for the performed tests according to DIN EN ISO/IEC 17025:2005. (except partner lab tests).
