Rapportnummer:	2404-N-04507
Datum van aankomst:	23.04.2024
Datum van het rapport:	26.04.2024
Testen begonnen:	23.04.2024
Testen voltooid:	26.04.2024
Status van het rapport:	Eindrapport

Diersoort:	Hond
Ras:	Cavalier King Charles Spaniel
Geslacht:	mannelijk
Naam:	Trusties Personality
Stamboeknummer:	NHSB 3245875
Chipnummer:	528140000840192
Geboortedatum / Leeftijd:	01.08.21
Type monster:	Swab
Eigenaar / Dier-ID:	Zijp-Bruin, Y.A.E.J.
IT No. / Report-ID:	---

Dry Eye Curly Coat Syndrome (CCS) - PCR

Result: Genotype N/N

Interpretation: The examined animal is homozygous for the wildtype-allele. It does not carry the causative mutation for DECCS in the FAM83H-gene.

Trait of inheritance: autosomal-recessive

Scientific studies found correlation between the mutation and symptoms of the disease in the following breeds:
Cavalier King Charles Spaniel

The current result is only valid for the sample submitted to our laboratory. The sender is responsible for the correct information regarding the sample material. The laboratory can not be made liable. Furthermore, any obligation for compensation is limited to the value of the tests performed.

There is a possibility that other mutations may have caused the disease/phenotype. The analysis was performed according to the latest knowledge and technology.

The laboratory is accredited for the performed tests according to DIN EN ISO/IEC 17025:2018. (except partner lab tests).
